Get Behind The Diamond Jubilee Celebration—Make July 1st and 2nd Real Jubilant Days!

ON CANADIAN PRO TEAM

Andrew Kay, professional golfer, of Lambton, Ontario, who has been selected to play on the professional golf team which will represent Canada in the games against the English golf team. The Britshers will shortly leave Great Britain for the United States where they will defend the Ryder Cup, which they won for the first time last year.

Alberta Coal Fields Contain Much Oil.

The announcement is made by the Chemical and Dye Trust of Germany that the Bergin method of converting coal into oil has at last actually been begun.

Petrol, benzine and lubricating oil is at this moment being produced from coal in Germany in large quantities on a commercial basis.

The oil is of the finest quality and the cost of the process is stated to be satisfactory. Chemical experts in Germany are confidently prophesying that within five years they will be independent of outside oil supplies.

The British government has carried out considerable research work and experiments in the production of oil and gasoline from coal, and H. Kerr Thomas, president of the Institute of Automobile Engineers, states that after experiments in the distillation of coal by the Bergin process that with the application of this method the province of Alberta possesses enough coal to supply the world with gasoline for the next thousand years.

The Bergin process for the hydrogenation of coal is considered so important that British, American and Dutch oil companies, in order to safeguard their own interests, have acquired holdings in it. It is the intention of the German dye trust to build two great "oil-from-coal" works. They have such a vast organization that they can undertake experiments on a large scale. The objection to the process has been the initial cost of the plant. The coal is reduced to powder, which is impelled into retorts where hydrogen gas is passing at great pressure. This converts the coal dust into a thick liquid like tar, which by refinement yields various grades of oil.

Professor Bergin said it had taken twelve years of research to make liquefaction of coal economical, but now it was possible by his process to liquify every grade of coal except anthracite.

One ton of bituminous coal will yield 164 gallons of oil, of which forty-five gallons is gasoline and the remainder gas oil, lubricating oil and fuel oil.

C.N.R. Building Big Depot

Construction work is being started immediately on the half-million dollar depot to be erected in Edmonton by the Canadian National Railway, the contract having been awarded during the past week to the Permanent Construction Co., Edmonton.

St. Paul's United Church Anniversary Services Sunday, June 5th.

Sunday next will be the occasion of the special services marking the twenty-first anniversary of the opening of St. Paul's United Church. The arrangements are now complete and success rests upon the interest displayed by the congregation and the public.

In the morning Rev. E. L. Best will preach with "The Thoughts of God" as a subject. The junior choir will be present and the usual morning congregation should be largely augmented.

In the evening Mr. Best will speak on "A Brother and a Star." For this service the senior choir have been making special preparations. All attending these services should be early in order to be comfortably seated by service time.

The Ladies Aid are serving their dinner as usual on Monday evening from five o'clock. Following this Mr. Best is giving his popular and entertaining lecture on "How To Be Happy Tho Married."

Mr. Best is from the United Church, Fernie, and is one of the best known ministers in British Columbia. Both the Sunday services and the Monday evening entertainments should be well attended.

Bishop Sherman at St. Alban's, Sunday

Whit Sunday Services will be held in St. Alban's Church, Coleman, on Sunday, June 5th.

Holy Communion at 7:30 a.m.

Confirmation Service at 11 a.m.

Members are requested to be early on Monday, June 6th, when a reception in the Parish Hall, Coleman, will be held at 8 p.m. for Blairmore and Coleman members to welcome the Bishop.

Captain Watt, of the local Salvation Army, wishes to thank the citizens of Coleman for their splendid support of the Self-denial effort which has been a great success.

Diamond Jubilee Inspires Song

At The Canada Jubilee

GORDON V. THOMPSON.

Canada's Diamond Jubilee has been the inspiration that led to the writing of a new Canadian song "At The Canada Jubilee" which has recently been published to commemorate the sixtieth year of confederation. Its composer, Gordon V. Thompson, has already established the reputation of being one of Canada's leading song writers. His popular war songs composed and published during the stirring days of 1914-18 are well known. There are few who do not know by heart the airs of "When Jack Comes Back," "Kishki" or "When Your Boy Comes Back to You," three patriotic songs in particular composed by Mr. Thompson during the War.

Mr. Thompson composed this new song recently while staying at the Chateau Frontenac at Quebec. Here at the very birthplace of Canadian history Mr. Thompson felt the urge to write something that would express the joy of Canadians at the coming great event. Having produced "At The Canada Jubilee" Mr. Thompson felt that another song, expressing the optimistic sentiments of Canadians, would be exceedingly appropriate. "Land of Glad To-Morrow" was the result of this inspiration which the composer feels expresses something of the optimism for the future throughout Canada at the present time.

Make Presentation to Leader

A very pleasant social affair took place on Tuesday of this week, when about twenty young girls of the Junior C. G. I. T. were entertained to tea at the home of their leader, Miss A. Foster. Following refreshments the group adjourned to the Club Rooms where games and other forms of amusement were enjoyed for an hour or two. Before the party disbanded the girls presented Miss Foster with a half dozen silver tea spoons.

Dr. D. A. McLeod returned on Monday from Edmonton where he was attending the annual convention of the Dental Association of Western Canada.

Let's Have a Real Parade

Every effort should be made to make the parade on Saturday morning, July 2nd, a real gala affair. Merchants and business firms in Coleman operating a drey or truck, should try and arrange a float for this memorable occasion. Fernie has arranged to have a float representing each of the Canadian provinces. A similar plan could very easily be worked out here in Coleman. The committee in charge of the celebration might be well advised to appoint a sub committee to work up this feature of the parade.

Messrs. J. A. McLeod and H. Wilton Clark motivated to Corbin on business last Saturday.

Coleman Tennis Club, McGillivray Cup, Men's Singles

Entries for this competition will now be received by the secretary and should be made at once.

The first event is open and a consolation event will be played by those failing to survive the two rounds of the open event.

The consolation event will be a handicap. Each entrant is thus assured of at least two matches.

All matches up to the semi-finals in each event will consist of two out of three long set matches and the semi-finals and finals shall consist of three out of five long set matches.

The players will make their own arrangements for balls. Entry fee 50c which covers both events. Entries close June 8th at 7 p.m.

It is hoped that as many as possible will enter for these events so that all members will have an opportunity to engage in match play.

In the event of any dispute arising it will be referred to the executive committee whose decision shall be final.

Players will make their own arrangements for umpires except in the finals and semi-finals when umpires will be appointed by the club.

The ranking players of the club will be chosen on the results of this competition.

Junior may enter if they so desire.

Delegates O.E.S. Convention

Minerva Chapter, O.E.S., is well represented at the annual convention of the order which opened in Lethbridge yesterday, June 1st. Messdames A. W. H. McLeod, Wm. Roughhead, M. W. Cooke, R. Evans, R. Tennant A. Graham, A. F. Short and George Dickson, are among those in attendance from Coleman.

The Coleman Garage Limited have another carload of Pontiacs on the way and this shipment is expected to arrive about the middle of next week.

BRILLIANT CANADIAN AUTHORESS
A new and authorized photograph of Miss Mano de la Roche, who recently won a \$10,000 prize offered by a well known American magazine for the best novel of the year.—Photo by Mr. Lyndell of Toronto.

Sudden Death of Coleman Resident

A well known and popular resident of Coleman in the person of James Beattie, passed away very suddenly last Sunday morning at the local hospital. The deceased, although he had not enjoyed the best of health for some time past, had been following his occupation of mining right up until the time he was taken to the hospital late Saturday night, and his many friends were shocked to hear of his sudden demise.

The late Mr. Beattie had been a resident of Coleman for some years and was well known as a member of the Coleman Pipe Band. He was a returned man having seen service overseas with the 185th Battalion of Cape Breton. He was 34 years of age and unmarried. He leaves a father and mother at New Stralsville, Ohio, a brother in Sidney Mines, N. S., and a sister in Glace Bay, N. S.

The local Masonic Lodge, of which the deceased man was a member, took charge of the funeral arrangements, and a service was held in the Masonic hall on Wednesday evening at 9 p.m., followed by a church service at St. Paul's, conducted by the Rev. H. J. Bevan. The remains were then taken to the local depot and placed on the 10:35 passenger for New Stralsville, Ohio, where interment will take place. Mr. Neil McKinnon, an old friend of the deceased accompanied the body to the home of his parents.

Sunday, July 3rd, is the date set by the national committee for the celebration of the diamond jubilee of confederation for a national thanksgiving day. It is proposed that the people gather at prominent centers for services of thanksgiving for the blessings that have grown out of confederation.

The Salvation Army will be holding their Home League and pantry sale in the K. of P. hall on Monday June 13th. The members of our Home League have been busy for the past six months making the goods which will be on sale. Tea will be served in the afternoon. The Home League solicits your patronage on this occasion.

Friday, June 3rd, is the King's Birthday, and a legal holiday. The wickets at the local P. O. will be open for one hour only, 9:30 a.m. to 10:30 a.m.

Mr. A. E. Whitman, of the McGillivray Creek Coal Company's office staff, purchased a new Ford Sports Roadster from the Coleman Garage Limited, last week.

1867 GOVERNORS-GENERAL OF CANADA Since Confederation 1927

It is curious to recall that sixty-odd years ago, when the union of the Canadian provinces was being discussed, many British statesmen looked askance at the proposal, in the belief that such a federation would be a prelude to secession from the Mother Country, as in the case of the American colonies. And still others were of the opinion that Canada "would never pay," and should be encouraged, or at least permitted, to break away. The passing years have proven how unfounded were those views. During the four years of the Great War, Canada equipped and sent overseas 850,000 men to fight for freedom under the Union Jack, and even before that time had earned the title, "The Bread Basket of the Empire."

In the above group are shown the thirteen men who have represented the Crown in Canada since Confederation—one a Royal Prince and all men of brilliant attainments in the councils of the Empire.

From left to right, top row, the group shows: Viscount Monck, 1867-68; Lord Lisgar, 1868-72; Marquess of Dufferin, 1872-78; Marquess of Lorne, 1878-83; Marquess of Lansdowne, 1883-88; Lord Stanley, 1888-93; Earl of Aberdeen, 1893-98. Lower Row—Earl of Minto, 1898-1904; Earl Grey, 1904-11; Duke of Connaught, 1911-16; Duke of Devonshire, 1916-21; Baron Byng, 1921-26; Viscount Willingdon, 1926—

After long tests we are convinced Aluminum is the best container for tea.

ROSE TEA

"is good tea"

Now packed only in Aluminum.

The Other Fellow's Viewpoint

In this year of Canada's Diamond Jubilee, when the thoughts of its people are being turned backward sixty years and they contemplate the truly marvelous change that has taken place, one great lesson, and the outstanding achievement of Confederation, stands out pre-eminently. A review of the years clearly demonstrates that Canada's material growth and development have been made possible because, to an ever increasing extent as the years have passed, the people of the Dominion have cultivated a spirit of good-will toward each other.

Confederation had many obstacles to remove, many difficulties to overcome, physical, geographical, financial, but the one problem that had to be solved, and failing which all others could not be surmounted, was to achieve a union of two races, French and English speaking, to create a feeling of respect and toleration for each other on the part of Roman Catholic and Protestant. To a large extent this has been accomplished, and it to Canada today owes its strength and prosperity.

The citizenship of Canada can render no more fitting or valuable service to its country, can make no greater Jubilee contribution to its welfare and progress, than to further develop its spirit of tolerance and good-will. Only by so doing can peace be maintained and strife eliminated from our midst; only so can effective cooperation be maintained; in the maintenance and development of such relations alone can be found the essentials of a true national spirit.

Studying conditions in other countries, one is happy to note in Canada today an absence of those suspicious, bitter feelings and lack of appreciation of the opinions of others, which appear rather general in other lands. This is not to say there is an entire absence of such antipathies in Canada. They do prevail to some extent, but the better, nobler, biterious of mankind are apparent.

For example, if the Russian people desire a communist form of government, that is their own business and Canada and Britain have no desire to interfere. But Russia should display the same attitude towards other countries, and not try to subvert the citizens of friendly countries from loyalty to their respective governments. The disclosure that Russia is using the diplomatic immunity accorded her representatives by other countries in an endeavor to overthrow their forms of government is revolting to every sense of decency and fairplay.

While desiring some of the methods adopted to promote national feeling in China, one cannot but sympathize with the aspirations of the Chinese people. Foreign rights and are respected in China, as in other countries, but there should be no interference in China's right to itself determine its national life and forms of government. One can perhaps better appreciate and sympathize with the Chinese viewpoint if we could visualize Buddhist priests establishing missions throughout Western Canada and opening Sunday schools to teach our children the tenets of the Buddhist religion. Would the Christian churches of Canada acquiesce in this?

Or imagine, whole sections of Vancouver, Victoria, and other cities set aside as Chinese or Japanese concessions wherein their laws governed and their trade was supreme. Would Canadians accept such a state of affairs? Rather, do we not even object to individual Chinese and Japanese competing on even terms with our own people?

Referring to these rather strange cases, not to pass judgment in regard to them, but to point the moral of this article, viz., that what is needed in the world today is more sympathy and less differences; more tolerance and less prejudice; more respect for and less suspicion of each other; more co-operation and less striving at one's purpose. And what the whole world needs is what Canada needs, in this Jubilee year, dedicate itself to achieve to the fullest degree for our own people and Dominion. Respect for each other's opinions and convictions, recognition of the other fellow's good qualities, a willingness to meet others half way in the solution of community and national problems, a realization that we all are Canadians with a common interest in the Dominion and its welfare and a common duty and responsibility to it to discharge.

Estevan Coal Fields

New System of Carbonization May be Used

F. A. O'Connell, of the Lurgi Corporation, Frankfurt-on-Main, Germany, inventor of the Lurgi system of carbonizing soft coal, and Dr. Frank Mueller, of New York, president of the Lurgi Corporation, who recently visited the Estevan coal fields with the view of possibly installing Lurgi carbonizers there, have been interviewed by Premier-Gardiner, Hon. T. C. Davis and Commissioner T. M. Maltby, of the Bureau of Labor and Industries. According to "The Leader," these men declared their belief that the Lurgi process could be used very well in the treatment of the Estevan deposits at a production cost of about \$5 per ton.

Scrubwoman (relating her adventures to a neighbor)—She says to me, "You ain't no lady." So then I says to her, "Two needles make an infirmity," and hands her one in the snout, and they ratas her off in an ambulance.

New Hotel For Moose Jaw

Community Hotel to Serve Well-to-do

The Community Hotel in Moose Jaw, now in process of organization, will be five stories in height with a frontage of 75 feet on Main Street and 125 feet on Gordon Street. It will cost around \$250,000. The building has been leased for 20 years by the Associated Canadiana Hotels, Ltd., Ltd., Vancouver, who will cater particularly to the increasing well-to-do tourist traffic, making Moose Jaw a staple in its passage to the Rocky Mountains and the Pacific Coast.

Peculiar, pale, restless, and sticky children owe their condition to worms. Mother Graves' Worm Expeller will relieve them and restore health.

Writing is Ancient Art
Whistler is a very ancient art. The oldest form of which there are existing examples are Babylonian and Egyptian. The Babylonians are wedge-shaped. They were written on clay, and the clay was baked into bricks, which formed permanent records, many of which have been unearthed and interpreted.

Mistress (dying deploring maid who has asked for a reference)—"Of course, Mary, I shall have to tell Mrs. Brown of your unaccountable temper. Mary—Thank you very much, Mum. I'll 'praps make 'er mind 'er 'P's and 'Q's."

A white shark has 21,000 teeth set in eighty rows of three hundred teeth each.

Plows With Manless Tractor

Spectators Marvel at Machine Used in Test Near Lincoln, Nebraska

A "manless" tractor, controlled by an electric device, plowed a field in Nebraska successfully before a crowd of farmers, professors of agriculture and business men.

Guided by a human hand, except when the first furrow was plowed to make a guide row, the machine, equipped with an automatic guide invented by F. L. Zibach, of Grand Island, Neb., plowed a square field on the College of Agriculture farm of the University of Nebraska, near Lincoln.

The tractor runs in an irregular circle, rounding the corners. Except for replenishing the gasoline and oil, it needs no attention. The electric control stops the machine should it leave the furrow, and when the work is completed.

The invention first was tried in 1921, Zibach said. Firing of riding a plow, he attached his device to his tractor, tilted the machine with gasoline and turned it loose.

Swollen Joints, Quickly Limbered Up Rub On Nerviline

You would be surprised at the wonderful action of "Nerviline" in just such cases. Being a natural oil preparation, it is able to penetrate quickly, and down it slips into the tissues, carrying its healthy food action wherever it goes. For stopping muscular or nerve pain, for easing a stiff joint, Nerviline is the best. Pain, soreness, stiffness all vanish before the magic power of this wonderful liniment. Early fifty years of success proves the merit of Nerviline, which is sold everywhere in large 50-cent bottles.

Ancient Cane Unearthed
An oak cane, nine feet long, and estimated to be from four to ten thousand years old, has been unearthed on the south bank of the River Tyne, near Ryton. It is in an excellent state of preservation, and has been placed in the Hancock Museum, Newcastle-on-Tyne.

WEAK, LISTLESS GIRLS

Need Such a Tonic as Dr. Williams' Pink Pills to Restore Health

When a girl in her teens becomes pale and listless, especially if at the same time she shows inclination to the easily, a listlessness and inclination to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements Dr. Williams' Pink Pills can supply. But an analysis of the blood is not needed—the physical signs are plain. Among these signs are a pallor of the cheeks and lips, dark circles under the eyes, easily tired and breathless after slight exertion. Poor appetite, headache, and sometimes fainting spells follow; often the patient is nervous and is startled at the least noise. In all such cases, a condition there is no other tonic will build you up so quickly and so surely as Dr. Williams' Pink Pills.

The statement of Miss Dorothy Lumb, of Lincoln, N.S., will bring home to other weak girls the power of this tonic. "My heart I could persuade every person who is in a run-down condition to give Dr. Williams' Pink Pills a trial. About a year ago I was a weak girl, suffering from impoverished blood and a run-down system, with many of the attendant symptoms. I had often read of Dr. Williams' Pink Pills and decided to take them, and after using six boxes I feel as well and strong as ever. The statement of Dr. Williams' Pink Pills will be my standby in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to others."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Scientists are endeavoring to determine when vibration began. They might also put it in the line determining when it is going to begin again.

Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 20 years to relieve babies and children of colic, flatulence, indigestion, wind, diarrhea, alternating Periodicities arising therefrom, and by routine the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiate.

The genuine bears signature of

Charles H. Fletcher

Spends Ninety-Eighth Birthday in Prison

"Lifer" Who Refused Pardon Has Served Twenty-Seven Years

"Old Charlie" Lindwall, the oldest prisoner in Joliet Penitentiary and the oldest in the country, observed his ninety-eighth birthday just as he had observed every milestone since 1900 and he probably will observe every anniversary until he receives the pardon of death. Lindwall, sentenced to the penitentiary for life in 1900 for murder, which he always denied committing, refused pardon a few years ago, maintaining he was too old to face the world. At the time he was sentenced the Court told him that his age alone had saved him from the gallows. Since then the Judge and most of the jurors have died, but "Old Charlie," half blind, feeble and bowed with his years, has clung tenaciously to life. He puts under the prison guard with no regard for his own life and no prisoner intruding upon his divan. At chapel services and for the weekly movie "Old Charlie" has a favored seat in the front row.

Millar's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonics in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

Machines Take Laborer's Place

Combines Do Work of Harvest Hands in U.S. Grain Belt

Combines, great, whirling machines that creep slowly across the limitless waves of waving wheat all this summer do the work of 25,000 harvest hands, little more important each year from the east and north.

Therefore this season fewer college boys will earn money to pay for next year's schooling by shocking grain behind clanking binders or glancing grain from the header into manure, threshers, and fewer thousands of men will converge in Kansas, in June, to spread over the prairie like locusts to live off the harvest.

The large combine, drawn by a tractor, cuts a 16-foot swath, threshes and sacks the grain and spreads the straw in its wake, all in one operation. One man drives the tractor, another runs the combine, and a third man hauls the sacked grain to the elevator in a truck. By this system the farmer can harvest 50 to 75 acres a day against 20 acres a day when the old system when he had 20 harvest hands, who had to be fed and provided with lodgings.

Could Not Disclose Secret

Pioneer Mind Resister Unable to Explain Strange Power

Anna Eva Pav, pioneer mind reader of the stage, is dead. And the secret by means of which for nearly half a century she puzzled theatre audiences, kings, queens, men of letters and psychiatrists, goes with her to the grave. She died at her home in Melrose, Mass. When the crew of the aged woman closed for the last time she still had withheld explanation of how she had been able to tell her patrons and acquaintances with baffling accuracy time and again what was going on in their minds. She insisted that she herself didn't know how she did it.

The Good Old Days

A trip to the Old Country by aircraft in 24 days is now a probability; one can talk on the telephone and see the party at the other end of the line; the time in miles can be picked out of the air by the mysterious devices known as the radio, and messages are sent into remote regions by the same means. It is being done, and it is being lightened by machinery—and still they talk of "the good old days."

—Farmer's Advocate.

Prospective Buyer—Hum—show me another one.

Minard's Liniment is reliable.

Our Canadian Climate

Nothing to Complain About When Compared With Other Countries

Snow and sleet and late seedling in the West, with cool showers in the East have not the pessimists to croaking about "Canada's late spring." But in the meantime these headlines were appearing in the press:

"Mississippi Floods; Thousands Homeless."

"Cyclone Hits Sydney; Heavy Damage."

"Deluge at Aden."

"Chile Volcanoes Active."

"Mediterranean Storms."

"Hilltop Cyclone."

"Earthquake in the Philippines."

"Tornado Sweeps Kansas."

So, after all, Canada is not so bad. Our winters may be rigorous, and our springs sometimes dubious, but taken all in all, and compared with other countries, our climates is as blessed as perhaps any in the world.

Progress of Sixty Years

Will be Strikingly Featured in Diamond Jubilee Celebration

It has been well observed that there could be few greater illustrations of the progress of sixty years in the realm of science than that afforded by one of the chief features in the celebration of the Diamond Jubilee. It is announced that the greatest exhibition of bells to be installed at Ottawa will be broadcast by radio to all parts of the world, and that the words of King George in reply to the playing of the National Anthem will be heard in Canada only three hundred and a second after they are uttered by him in London, England. It is certainly a marvelous turn of scientific invention.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonics in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

Work of Colonization Associations

Expect to Locate 2,000 Families in West This Spring

April was the second month of the Canada Colonization Association when 110 families were settled upon 29,522 acres of land in the Prairie Provinces. This followed the previous best in March when 78 families were placed upon 18,100 acres. Altogether in the first four months of 1927 some 250 immigrant families have been placed on 68,095 acres of land, previously idle, almost equally in the provinces of Manitoba, Saskatchewan and Alberta. By June 1st it is expected that there will be 2,000 families on 600,000 acres of land in Western Canada wards of the Association. As families average 5.7 individuals to the family this will mean the satisfaction of farm families of about 11,600 persons through the efforts of the Association.

Cuts and Bruises Disappear—When suffering from cuts, scratches, lacerations, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Electric Oil. It is the best remedy well known in every section of the community. A bottle of Dr. Thomas' Electric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Pinocarpies may be raised by the hundred thousand without attracting special attention, bananas are worth a few cents a bunch, and oranges are as cheap on the west coast of Africa.

The successful manufacturer has plenty of business on hand.

Aeroplane Service to Mine Field

A regular airplane service between Lac du Bonnet and Long and Rice lakes is being undertaken this spring by the Western Canada Airways. The trip will be negotiated in 45 minutes, as against three days by canoe. The inauguration of a daily mail service to these mining fields is under consideration by the Government.

Heart Palpitation Dizzy, Sinking Spells

Mrs. M. A. Gagnon, Donville, Alta., writes:—Some time ago I was very nervous, could not sleep at night, often had dizzy, sinking spells and palpitation of the heart, and was so run down I could not do my housework, but just have everything and sit down.

I spent a lot of money using medicine from the doctor, but it did not do me any good.

At last a friend told me to use and after using a couple of boxes I was not the same woman. I began to feel so much better, and after a few more boxes I was in perfect health. I always recommend them to all heart trouble."

Price 50c. a box at all druggists or dealers, or mailed direct on receipt of price by The T. M. M. Co., Limited, Toronto, Ont.

Paper Mill Bottles

As a substitute for glass bottles, a Louden dale is using containers made of a stout, transparent paper. When they are filled, they are brought together in the form of a cone and sealed with a metal clip. The breakage and loss of glass are saved by this plan, and the paper bottles are easily manufactured and sterilized.

Regulations for Fur Farms

Alberta was represented by Hon. George Hoadley, Minister of Agriculture and Benjamin Lawton, Game Commissioner at a meeting of officials from all the western provinces and Ontario, held at Winnipeg on May 20 and 21. As a result of this meeting uniform regulations will be drafted governing the operation of fur farms throughout the west. Some 200 applications have already been received from fur farmers who intend to breed muskrats and beaver on land adjacent to lakes in various parts of Alberta.

More Attractions for Tourists

The 1927 program of development in connection with Canada's National Parks includes the opening of the new motor highway from

Lake Louise to Golden, the building of an exceptionally attractive hotel in Waterton Lakes Park and the inauguration of a through motor bus service between Glacier Park in Montana and Waterton Lakes, Calgary, Banff, Lake Louise and Field. These improvements will undoubtedly attract many more tourists to the scenic spots of the province the coming season.

Members Plan Northern Tour

Preparations are being made for a tour of the Peace River country during the latter part of June by members of the legislature from all parts of the province. The trip will be made by special train over the E. D. & B. C. and Central Canadian Railways, and it is expected that a large proportion of the members will take advantage of this opportunity to visit the northland.

Regina's New Hostelry

1. The Library. 2. Ten Room. 3. "Hotel Saskatchewan".

The latest addition to the chain of Canadian Pacific Hotels, the "Hotel Saskatchewan," which was officially opened by President Beatty, on May 24, is a modern hotel of a character in keeping with the importance of the Capital City of the Province which furnishes 50 per cent. of the Dominion's wheat output. Regina—"Queen City of the Plains," which has been rapidly developing into one of the great cities of the continent, has long felt the need of a new hostelry. As long ago as 1913 the erection of an hotel was actually started, but when the War came along this project was abandoned, and the unfinished steelwork has remained exposed ever since until it was removed last year. The removal of this old steelwork marked the first step towards the realization so long delayed of Regina's dream of a splendid new hostelry, which has at last been brought about by the enterprise of the Canadian Pacific.

The new hotel was conceived and designed with two considerations always uppermost in the minds of its creators; the maximum of comfort and convenience for its guests and a pleasing architectural effect. With the desired result in mind the architects have developed a design which is singularly pleasing and which will be regarded as one of the most beautiful buildings in Western Canada.

The exterior of the building is designed in Georgian style, the first two storeys above the street being faced with Tyndale stone, quarried near Winnipeg. The main entrance has been treated with Corinthian pilasters.

The Hotel is an eleven-storey building, containing 216 bedrooms with baths, and many beautiful public rooms and administrative offices. Two storeys with space for more guest rooms have been left uncompleted.

One of the most pleasing rooms in the Main Lobby is overlooking the Park. The treatment of this room has a Spanish character, the antique decorated plaster, and large carved fire-place giving it a pleasing effect.

The ceiling is heavily beamed and paneled. The Ball Room, of a George Adams design, is on the first floor, as are also, the Lounge, the Library and the Writing Room.

The mechanical equipment is of the most modern design, all the services being practically self-contained. The hotel has its own refrigeration and electrical generating plants.

Canada Most Prosperous Country in the World

Do you realize that Canada is the most prosperous country in the world today?

The Canadian Business Research Bureau gives facts and figures which should make the heart of every Canadian rejoice. Even though local conditions may or may not bear out the statements of the bureau one must realize that the state of affairs dominion-wide cannot but help effect conditions in every section of the country.

Between 1901 and 1925 Canada changed from an agricultural country into one in which manufacturing is equally important. The following figures are given.

Manufacturing production has grown from 214 to 1,311 millions of dollars. Forest production practically doubled. Mineral production increased from 66 to 228 million dollars. Coal output grew from 4 to 13 million tons and mileage of Canadian railways from 18,149 to 52,692. The wheat yield in 1926 exceeded \$406,000,000 and the field crops totalled \$1,131,241,000.

During this period Canada's foreign trade rose from 196 to 1,878 million dollars a year, and per capita exports from \$36 to \$115. Never before in the history of the world, have such increases been recorded in a nation's trading in a similar period.

The National Foreign Trades Council, of New York, recently issued a statement showing that Canada led all nations in increased trade since 1913. The Dominion headed the list with an increase of 85%, followed by Australasia with 55%, and the U.S.A. with 31%.

The League of Nations Bureau recently issued a statement that Canada's per capita wealth had grown from \$1,100 in 1903 to \$2,406 in 1926. No nation has previous shown such a rapid growth.

The National Bureau of Research of the United States, recently published the results of 17 years' trading, showing that Canada had enjoyed more prosperity than any other nation.

Another Producer in Sunburst Field

A brisk demand for oil lease acreage in the extreme south of the province has followed the announcement that a flow of high quality crude oil has been struck at a depth of 2,335 feet in the Hart Green well located two miles south of the International boundary in the Kevin Sunburst field.

WORLD HAPPENINGS
BRIEFLY TOLD

Reports from the north-side of the island of Jamaica said a heavy northerly storm had destroyed 25,000 banana trees.

Thirty-seven earth tremors were felt recently in Yugoslavia within 48 hours. Some lives were lost in panics caused by the quakes and considerable material damage was reported.

A memorial porch erected by the Canadian Women's Press Club in the memory of the late Col. George Ham, famous Canadian journalist, who founded the club has been unveiled at Whiteby, Ont.

Canada's flag floated over the Canadian legation at Washington on the Victoria Day. It was the first time that it was officially displayed in Washington, D.C. Vincent Massey, Canadian minister, having used the Union Jack on previous occasions.

Professor Hugh Edward Egerton, noted authority on British colonial history, is dead at Oxford at the age of 72. Professor Egerton was professor of colonial history at Oxford for 15 years. He was the author of many books on British Colonial policy and development.

According to a story in the Toronto Star, Captain Charles Lindbergh's family can claim relationship to William Lyon Mackenzie, and therefore the famous New York-Judah story is related to Premier Mackenzie King of Canada. His grandfather was Charles H. Lind, born at Simcoe.

Milo Webster, 33, aviator and stunt flier, plunged 4,000 feet to his death at Muskogee, Okla., in full view of his 64-year-old mother and a large crowd of spectators. Webster lost his grip on his parachute bar as the big bag opened. Mrs. Webster fell unconscious.

The effect that aurore borealis, called the Northern Lights, has upon radio transmission is being studied by the National Research Council of Canada. The associate committee on physics and engineering of the council met at Ottawa and recommended that research work in this matter be undertaken.

Will Construct Seadromes

Landing Places for Aeroplanes to be Anchored in Atlantic Ocean.

The Philadelphia Public Ledger says that announcement was made by Edward R. Armstrong, inventor, of Wilmington, Del., that work would be started within 60 days on a test "seadrome," or landing field to be anchored in the Atlantic Ocean as a station for trans-Atlantic aeroplanes.

Mr. Armstrong was quoted as having said that plans were under way for the formation of a trans-oceanic flier organization. He intimated this organization might be headed by Captain Charles A. Lindbergh.

The test seadrome, The Public Ledger says, will be about 150 feet square, and will be anchored at a point 500 miles slightly north and east of New York. If the test proves effective eight full size seadromes will be built, each 1,200 feet long, at a cost of \$1,500,000 each.

A New Building Material

A new material called colotex is being made from the refuse of sugarcane, and is being used in some parts of Australia for building houses. Some parts of the Federal Parliament House in Canberra have been built of colotex, and model houses have been built at Canberra and other towns to demonstrate its value.

The skeleton of a gigantic animal that lived about 3,000,000 years ago has been discovered by engineers who are building a railroad between Turkistan and Siberia. The beast is believed to have been a saurian.

Canada has within its borders the largest inland sea after the Mediterranean-Hudson Bay. This is a Canadian-Mediterranean, as large as the Baltic.

Lightning. Instead of being flat and jagged, as it appears, really is spiral and wanders around and around in space before it exhausts itself or strikes something.

Research Laboratory at Lacombe. A research laboratory is to be established this year at Lacombe, for the purpose of making a survey of plant problems within the province.

The average man is more polite to people he never expects to meet again than to those whose friendship is really worth cultivating.

Coffees will hold silently for hours for field mice, a park naturalist in the West says.

Extend Period Of
Aviation Agreement

U.S. and Canadian Airmen Cross

Border on Defined Conditions
The existing agreement between the United States and Canadian Governments by which aviators of either country may fly into the territory of the other under certain defined conditions has been extended until October 31. The extension of the agreement was accomplished by an exchange of notes between the State Department and the Canadian Legation.

The agreement has been in effect since 1922. It provides that when an American aviator desires to fly into Canada he shall give notice in advance to the secretary of the Canadian Air Board at Ottawa, giving the date of the proposed flight, the owner's name and address, the type of machine to be used, the route and duration of the flight and the purpose for which it is to be undertaken. The procedure is the same for Canadian flyers desiring to visit the United States by air.

Recalls Romance of Boer War

Woman Despatch Rider Who Married

British Colonel Is Dead

By the death of Mrs. Catherine Vaughan, widow of Col. A. Owen Vaughan, of Maskegon, near Cardiff, Wales, a remarkable romance of the Boer War is recalled. Mrs. Vaughan, who was a relative of President Kruger, was a skilled horsewoman, and acted as a dispatch rider for the Boers. Col. Vaughan, then a British force as a captain, was attacking a Boer post when the young Afrikaander woman dashed out on horseback to bring aid to the beleaguered. As she refused to stop, Capt. Vaughan shot her horse and captured the dispatch rider, whom, to his surprise, he found to be a woman. The acquaintance thus made led later to marriage. Col. Vaughan, who was better known as "Owen" Blouet, a noted Welsh historian and novelist, died eight years ago.

The effect that aurore borealis, called the Northern Lights, has upon radio transmission is being studied by the National Research Council of Canada. The associate committee on physics and engineering of the council met at Ottawa and recommended that research work in this matter be undertaken.

A Smart Schoolroom Frock

Practical yet decidedly smart is this attractive one-piece frock having the two-piece effect. The bodice and skirt are joined to the bodice and the sleeves may be long and gathered to narrow wristbands, or short. A becoming round collar finishes the neck and a trim belt fastens with a buckle in front. No. 1604 is in sizes 8, 10 and 12 years. View A, size 8, requires 1 yard 35-inch plain material, and 1 3/4 yards figured. View B, size 8, requires 2 1/2 yards 35-inch, or 2 yards 54-inch plain material, and 1 1/2 yards 54-inch contrasting. Price 29 cents the pattern.

A POPULAR MANAGER

T. E. Chester, Manager, Hotel Saskatchewan, Regina. Mr. Chester entered the service of the Canadian Pacific at the Empress Hotel, Victoria. He had been assistant manager of the Royal Alexandra Hotel, Winnipeg, before coming to Regina.

Previous Atlantic Flights

Aviators Who Have Made Trip During

Years 1919 to 1924

May, 1919 — The United States Navy seaplane NC-4 flew from Newfoundland to Lisbon, Portugal, stopping at the Azores.

June, 1919—Captain Alecock and Lieut. Arthur W. Brown, British aviators, flew without stop from St. John's, Newfoundland, to Clifden, Ireland, 1,629 miles.

July, 1919—British airship R.3, flew from Scotland to New York and from New York to Falmouth, England.

August, 1921 — The United States round the world fliers crossed from Scotland to Ireland to Greenland, October 12, 1921—The Zeppelin ZR.3, now the Los Angeles, was flown from Friedrichshafen, Germany, to Lakshurst, N.J.

SUNDAY SCHOOL LESSON
JUNE 5

PETER PREACHING TO GENTILES

Golden Text: "For there is no distinction between Jew and Greek; for the same Lord is Lord of all, and is rich unto all that call upon him."—Romans 10:12.

Lesson: Acts, Chapters 10 and 11. Devotional Reading: Psalm 67:1-7.

Explanations and Comments

1. How a Gentile Was Prepared for Christianity, verses 1-8. — Cornelius was a Roman centurion in command at Caesarea. One night he had a vision in which an angel said to him, "Cornelius, thy prayers and thine alms have come up for a memorial before God."

Then the angel bade Cornelius to send to Joppa for Peter, who was staying with Simon the tanner by the seaside. Cornelius was a Gentile, and Jews would not enter the house of Gentiles. Yet Cornelius obeyed the command. He called two of his household servants and one of his soldiers, explained to them his vision, and sent them to Joppa.

"Great thoughts are in the air for these who are open-minded; noble impulses crowd the highways for those who are ready to receive and act upon them." — Hamilton Wright Mabie.

Not a "Vanishing Race"

Indian Population in Western Canada

Is About 35,000

From Ottawa comes the statement that the Indians are increasing in population. They are no longer a "vanishing race." In western Canada the total population today is about 35,000.

It is welcome news. We should like the Indians well. These picturesque people form the genuine native race of North America. Descendants of ancient nomads who most probably entered the Western Hemisphere from the Orient across the strip of land that has now perished to form the Bering Straits, the famous Redskins deserve the kindly fate which civilization has reserved for them.

IS CHIEF CLERK

Fred S. Smith, chief clerk, Hotel Saskatchewan, Regina, has been promoted from the Royal Alexandra Hotel, Winnipeg. "Freddie" is reputed to know every man, woman or child who has been a guest at that hotel.

Made Remarkable Test

Sound of Human Heart Beat Amplified

Ten Trillion Times

Washington.—The sound of a human heart beat was amplified ten trillion times before the American Medical association, meeting in convention here. This was the greatest sound amplification ever achieved in history.

In the Washington auditorium building, hundreds listened spellbound while sound, like a giant treading an empty hall, filled the entire structure. Out in the street, pedestrians paused, their ears alert to what sounded like distant cannon fire.

The main purpose of the development of the instrument, an electric stethoscope, was the treatment of heart diseases.

Much of the quackery attached to humanity is cultivated.

Studying History
Of Canada

Knowledge of Dominion Best Equipment for Good Citizens

McGill University has decided to give a complete course in Canadian history for the first time in the record of that institution. The reason given for this is that the Department of History feels the necessity of allowing students a chance of obtaining a broad general knowledge of the history of the Dominion. The history of Canada will be a third-year course, following a complete course on the history of the Western Hemisphere. It is designed to enable the student here to grasp trans-Atlantic conditions, the Faculty further states.

This is a step in the right direction, taken not before it was high time. These familiar with educational conditions in this country have often complained that students were taught far too little of general world history and geography; but surely it is the proper thing, and a sound plan, for every student to know his own land, first, and to know its history thoroughly. How otherwise can he fit himself adequately for the duties of citizenship and all they imply?

It is necessary to know what movements prompted the men who fought for freedom and liberty of ideas in the past in order to realize how Canada has grown to be what she is today. It is essential to have a clear conception of the ideal that lay behind the fight for Confederation in order to understand the problems this Dominion is facing today between East and West. A sound knowledge of one's own country is the best possible equipment for a citizen, whether he be engaged in a commercial or a professional career.

History has moved wisely, and in the right direction, in this matter.

For Empire Unity

Premier Baldwin Says Empire is a

Great Force for Righteousness

"We must devote our best energies to the years to come. Tory, Liberal and Labor alike, to make our unity such a reality that men and women will regard this Empire as one and it may become possible for them to move within its bounds to New Zealand, Australia, South Africa and Canada, as easily and freely as from Glasgow to London or from Bristol to Newcastle." Premier Stanley Baldwin declared in a Victoria Day address broadcast throughout England.

Mr. Baldwin appealed to all Britons to help make the Empire a great force for righteousness in the world. "The British Empire," he said, "is a spiritual inheritance. Which we hold in trust, not only for its members but for all the nations which surround it. Let us see to it that we hand it on to our successors with untarnished glory."

Signs of True Prosperity

Making Not Hoarding of Wealth

Means More to Nation

Bathrooms and refinement are not symbols of prosperity, neither are palatial residences nor huge apartment buildings. For every million-dollar residence there will be a thousand hovels. The true signs of wealth and prosperity are growing crops, live stock grazing on the hill-sides, the buzz of the saw in the forest, minerals coming to the surface of the working mines. It is the creation of wealth, not the hoarding of it, that brings prosperity to a nation.

Unusual Insurance Policy

An Old Chinese Custom

Remains of 400 Being Moved From

Toronto for Ancestor Worship

The Chinese of Toronto are raising funds to exhumate the remains of 400 Chinese buried in Ontario with a view to sending them to China for reburial there. Mr. Mark, of a Chinese publishing house, said that there would be at least 200 sent from Toronto. The cost of the trip in the vicinity of \$12,000.

"It is an old custom," said Mr. Mark, and was connected with ancestor worship, the Chinese believing in the worship of the elders of their family. They believed in the spirit, that the man by virtue of the skeleton was deposited in his identity as an individual being when alive with the exception that the flesh had been dissipated by the magic of death. They believed that the spirit lived on somewhere, possibly in the skeleton, possibly not. But the bones were needed to be moved so that the heirs in China could worship them. They had to be buried there for this.

Prefers Coffee to Bone

Allen Burdick, of the Police Depart-

ment at New Canaan, Conn., is a

genuine "coffee hound." He must

have his coffee in a cup with a little

sugar before he will consider even

the most tempting bone.

The Twentieth Edition

McKim's Directory of Canadian

Publications for 1927

The 1927 edition of McKim's Directory of Canadian Publications has just been issued and this publication no doubt, will be welcomed by national advertisers throughout Canada and the United States.

It is the twentieth edition—the first issue having appeared in 1907 and it has been the endeavor of the publishers at all times to make each number more complete and more dependable than previous editions.

In fact, this directory is accepted generally as a reliable source of information on Canadian publications and is regularly consulted for Canadian geographical and statistical particulars twelve months in the year.

Stockyards For Saskatoon

The Edmonton Stockyards Limited

have secured an option from the

City of Saskatoon on 23 acres of land

on Canadian Pacific Railway lines.

The stockyards are expected to be in

operation by the end of August.

Whining women and children are

bad enough, but deliver us from whin-

ing men!

Fame may come to a man sudden-

ly and go just as quickly.

Strange Sight in Berlin

Steeple Left in Basement Where it

Fell 200 Years Ago

One of the strangest sights in Berlin, although unknown to most people, is a church steeple in the basement of an ancient house.

On August 28, 1734, the steeple of St. Peter's Church tumbled with a loud crash, pierced the roof and two floors of an adjacent house and landed in the basement.

Nobody ever bothered to put the tower back in place, nor even to remove it from its resting place. A new steeple was built and the damage done to the house repaired. The cellar, however, with its unique cargo, was simply locked.

Saskatchewan Egg Pool

It is announced that the new Sas-

katchewan egg pool, started April

16th, is to be a storage pool. A cer-

tain proportion of the eggs received

in the pool will be placed in storage

and the final payment will not be

made until all the eggs have been

sold. Members shipping to this pool

will receive a statement showing the

exact number of eggs shipped by them

in the pool when the cut-off is made

in six or eight weeks.

Many a man who thinks he thinks

has a wife who does his thinking.

Prudence is a wit often used to

cover a bald character.

REQUIRE YEAR LONGER TO REACH PORT CHURCHILL

Ottawa.—Completion of the Hudson Bay Railway by May of next year if the terminal is to be at Nelson but about a year later if it should be Port Churchill, was forecast by Hon. C. A. Dunning, minister of railways. He told of how the work is progressing both as regards putting the existing line in shape for operation and also the new construction. The headway being made is considered very satisfactory.

As between Churchill and Nelson, the minister expressed no preference, stating the decision will be based upon the best expert advice obtainable. Mr. Dunning will accompany the British engineer, Frederick Palmer, to both places at the end of July, and a number of high officials will also be present. Meanwhile, preliminary data is being collected while the investigation is on conditions on the straits is under way.

"There is no rivalry between the two potential terminals," Mr. Dunning said, "because there is no population to agitate. At Nelson a contractor and a few others are about the only white residents while at Churchill there is only a Royal Canadian Mounted Police post. A large development, however, is foreseen when the line is finished."

Should the line go to Churchill, the road will not be completed until August, but deflecting at a point 15 miles from there.

Meanwhile, a big rush to the north country is reported by prospectors, farmers, hunters, trappers and all sorts of people attracted by the lure of the district. It has been necessary to put on a regular weekly service in place of the wayfarers being accommodated on the construction trains.

It also is announced by the Minister of Railways that the formalities have just been concluded for absorbing the Grand Trunk Pacific into the Canadian National Railway for corporate as well as operating purposes. The debtors holders all have agreed to the settlement, whereby their old securities were exchanged for the new ones authorized by Parliament last session. The settlement removes a "long hanging grievance."

Better Labor Conditions

Ship-building on Clyde Creates Demand For Men

London.—In a little over four months the number of unemployed workers in the Clyde district has dropped by one third. The improvement is mainly due to increased activity in shipbuilding and marine engineering. There has even been a shortage of labor for some urgent jobs, and employers have shown readiness to accept apprentices, a condition that has not been apparent for years.

Future of the Dominion
Ottawa.—"Our grandfathers may even live to see the seat of Empire transferred to our shores," declared Dr. J. H. Coyne, of St. Thomas, Ont., president of the Royal Society of Canada, in discussing the Dominion's future at the society's forty-sixth annual meeting. "The future of our Dominion," he continued, "is in the hands of the white man."

Hon. R. Lemieux Honored
Rome.—Reception and luncheon in honor of Hon. Rodolphe Lemieux, speaker of the Canadian House of Commons, and Madame Lemieux, given by the British ambassador to Italy, Right Hon. Sir Roland Graham, was attended by several English and Canadian visitors in addition to a distinguished gathering of residents of the capital.

National Thanksgiving Day
Ottawa.—Sunday, July 3, was the date set by the national committee for the celebration of the diamond jubilee of Confederation for a national thanksgiving day. It is proposed that the people gather at prominent centres for services of thanksgiving for the blessings that have grown out of Confederation.

Choir of 11,000 Voices
Ottawa.—A choir of 11,000 voices including 1,000 voices selected from 70 churches, irrespective of race or creed, and 10,000 school children, will sing a program of patriotic songs and anthems in connection with the jubilee celebration held at J. L. Rickwood, Ottawa, will direct the choir.

W. N. C. 1933

Would Send Boys to Canada

Isle of Man Has Scheme for Community Settlement in Dominion
Montreal.—Canada is the country to which the Isle of Man is looking for the settlement of her youth, said J. B. Crookall, J.P., mayor of Douglas and member of the House of Keys, who reached Montreal on the White Star liner Doric. Every year the Isle of Man has about 400 boys leaving school at the age of 14. A proposal is being made to raise the leaving age to 15, following which the island authorities would give them a course of training for one year to fit them for emigration. Mayor Crookall hoped that Maxmen in Canada would interest themselves in this project.

The mayor outlined a scheme he had for the community settlement of Maxmen in Canada. He proposed to send out 100 families if the Dominion government would set aside a tract of land sufficient to provide for them, making the terms as easy as possible. About 50 per cent. of these families would be agricultural.

Prize for Pacific Flight

Hawaiian Offers \$25,000 to First Aviator Making Nonstop Trip

Honolulu.—The Star Bulletin, in a copyrighted article, announced that James D. Dole, president of the Hawaiian Pineapple Company, has offered a purse of \$25,000 to the first aviator and \$10,000 to the second flier to make non-stop flights from the Pacific Coast to Hawaii during the 12 months starting August 15.

New York.—The Delancey monoplane "Columbia," in which Clarence Chamberlin had hoped to be the first to fly to France, will be entered in the \$25,000 contest announced by James D. Dole in Honolulu. The Fokker monoplane "America," which also was entered in the contest, was the flight by Charles Lindbergh, may and may not try the Hawaii flight, it was said.

The Favored Country

British Labor Leader Says Emigrants' Opportunities in Canada Best

London.—Canadian labor presents possibilities that no other country in the world provided the right kind of immigration is regulated so as not to displace the existing workers. In the opinion of C. T. Cramp, general secretary of the National Union of Railwaymen, who has just returned from a tour of the Dominion.

Mr. Cramp was struck by the "revolt of Canadian organized labor against the domination of American unions and the similar movement among professional associations. Canada's railways also came in for a glowing reference from Mr. Cramp.

New York Financier Dies

Payne Whitney, One of America's Richest Men, Victim of Heart Attack

Manhasset, N.Y.—Payne Whitney, financier, philanthropist, sportsman and one of the richest men in the country, died of a heart attack while playing tennis at his country estate, Greenvale.

Mr. Whitney was 52 years old. He was the brother of Harry Payne Whitney, son of the late William C. Whitney, secretary of Navy under Cleveland. Estimates of Mr. Whitney's fortune in Wall Street from \$100,000,000 to \$400,000,000. In 1921 he paid an income tax of more than \$2,000,000. Only John D. Rockefeller, Jr., and Henry Ford, paying more.

Postmasters' Convention

Regina, Sask.—T. P. Murphy, Ottawa, superintendent of the equipment and supply branch of the federal post office department, will represent the postmaster-general at the fourteenth annual convention of the Saskatchewan Postmasters' association to be held in Regina, Tuesday, Wednesday and Thursday, June 7, 8 and 9. About 150 delegates are expected to be in attendance.

Cable Bill Passed

London.—The House of Lords has given third reading to the Pacific Cable Bill, which has now passed both Houses. The bill authorizes reorganization of the Pacific Cable Board in accordance with the settlement of Canada's dispute with that body reached at the last Imperial conference.

Plane Service for Mines

Whitby, Ont.—An aeroplane passenger and freight service to the central Manitoulin mine area was inaugurated on June 1. It marks the first commercial air service to operate in the province. Western Airways commenced its operations last year to the Red Lake district of Northern Ontario.

Experiment Was a Failure

New Zealand Lost Heavily in Attempt to Control Price of Butter

Vancouver.—New Zealand's little attempt to fix the price of butter on the London market and the boycott by the London buyers of more than a million boxes, or roughly, 56,000,000 pounds, that were allowed to accumulate in cold storage in Britain in April, have been factors in the shortage of butter supplies in Canada during the past five months.

The action of British merchants in buying butter from Argentina, Australia and Canada, while leaving New Zealand's price-controlled stocks severely alone, withdrew from Canada heavy supplies that normally would have been available for home requirements, it is said here.

As a result, Canadian butter dealers have been scrambling for immediate requirement for months, plucking up stray stocks here, there and everywhere, some being brought back from London, some from Quebec, some imported from the United States, and a total of about seven million pounds shipped direct from New Zealand.

The lateness of the season in Canada has also been a factor in the shortage here, spring production being about a month later than usual.

RUSSIAN TRADE AGREEMENT IS TO BE ABROGATED

Ottawa.—The Government has decided to terminate immediately the trade agreement with Russia, it was announced following a lengthy meeting of the cabinet council.

Premier King, in making the announcement, declared this action had been decided upon after a full discussion of the situation created through the decision of the British Government to sever its relations with Soviet Russia. Evidence in the hands of the Canadian Government made it clear, the Premier said, that certain sections of the agreement between Canada and Russia had been violated by the Russian Government. Premier King pointed out that the agreement was subject to termination unless certain conditions were fulfilled. He specifically quoted a provision agreed to refrain "from hostile action or undertakings against the other and from conducting outside of its own borders any official propaganda direct or indirect against the interests of the British Empire or the Union of Socialist Soviet Republics."

Premier Baldwin's statement in the British House of Commons, and evidence before Canadian Government, had made it clear, the Premier said, that this agreement had been violated.

Premier King stated emphatically that termination of trade agreements would not mean discontinuation of relations between Canada and Russia. It would mean that certain quasi-diplomatic privileges enjoyed by the Russian trade commission would be terminated, but every effort would be continued to further trade between Canada and Russia in the same manner in which Canadian trade relations with other nations were conducted.

The Premier said evidence in the hands of the Canadian Government does not disclose any espionage or subversive propaganda so far as the Montreal office of the Russian trade commission is concerned.

WOULD DEVELOP CANADIAN TRADE WITH BRITAIN

London.—"I am here to visit Canadian trade commissioners in Britain and on the continent and to acquaint myself more fully with the possibilities the markets here offer for Canadian products," Hon. James Malcolm, Canadian minister of trade and commerce, told newspapermen in an interview. He added that he was more particularly desirous of increasing inter-empire trade, of which he had been a constant advocate.

The minister mentioned the grant of \$100,000 made by the Canadian government for developing Canadian goods in Britain. To receive the benefits of applying the money was an important object of his visit, he said. Mr. Malcolm acknowledged that the figures of Canadian trade with Britain lately had shown a decrease, through the lowered ability of Britain to purchase Canadian products, although Canadian purchases from Britain showed a slight increase. He believed adequate publicity would soon help to correct the balance. There was always, he said, some unreliability about statistics and they did not invariably show the exact position of trade between two countries like Canada and Britain.

Trade With U.S.

Canada Regarded by U.S. as Best Outside Field for Investment

Detroit, Mich.—Business of the United States made an eloquent case of admiration for its neighbor to the north when the National Foreign Trade Convention turned over an entire session to Canada and Canadians.

Speakers with only one exception were Canadians. They spoke of their great commerce in hard wheat and plywood, of their other export trade and of the growing interest of Americans in Canada as attested by their investment of \$3,600,000,000 within the Dominion. Sixty per cent. of all foreign investments in Canada came from the United States, the convention was told by Case R. Howard of the Canadian Bank of Commerce, New York.

"We take it as a compliment," he added, "that Canada is regarded in the United States as the best outside field of investment, and we interpret it as an indication of the estimate placed by the United States upon the character and ability of Canadians."

Agree on Claims

Washington.—The British and United States governments have agreed on a settlement of mutual claims, and those of individuals against both governments for seizure of war-time shipping, but terms of the settlement are being withheld, pending an arrangement for publication of final reports ratifying the pact. The claims grew out of detention and search during the war on shipping of both countries suspected of carrying war supplies to the enemy.

Will Complete in Prize Swim

Montreal.—Ereket Vierkotte, Germany's foremost swimmer and conqueror of the English Channel, has arrived in Montreal. He will participate in the Lake George swim for a prize of \$10,000 and later go to Toronto, where he will take part in the \$50,000 race to be held in Lake Ontario off the Queen City during the summer.

Ox-Tongue Falls, Lake of Bays

Throughout the Lake of Bays region of the Highlands of Ontario, which the members of the Canadian Weekly Newspapers Association will visit when holding their 1927 convention at Digby Inn, there are many beautiful waterfalls, which Ox-Tongue Falls shown above is one. Canadian National Railway photograph.

Investigating Plan to Use Sulphite Wastage

Scientists See Possibility of Making Substitute for Gasoline

Ottawa.—Canadian scientists are investigating the possibility of the manufacture of a substitute for gasoline out of the wastage in the numerous sulphite mills throughout the Dominion. It was revealed at a meeting of the associate committee of physics and engineering of the National Research Council of Canada here.

The sulphite mills, it was declared, in the manufacture of pulp for newspaper are wasting at the same time tremendous quantities of liquor which is a potential source of alcohol. Properly designed motors have been found to operate efficiently on a mixture of alcohol and benzine.

The committee also recommended today that the national research council investigate steps to secure detailed information on the measurement of the ultra-violet rays given off by the sun. If it can be shown that great benefit is to be obtained from these rays, it is recommended, that special glass should be manufactured in Canada for homes and other buildings. The health giving ultra-violet rays do not, to any great extent, pass through ordinary window glass.

Building New Telegraph Line

Work Will Commence at Once in Northern Saskatchewan District

North Battleford.—Construction is to proceed on a telegraph line between North Battleford and Meadow Lake. The distance is 55 to 60 miles. The line will serve to link up the Meadow Lake country with the splendid farming sections farther west. It will be a means of communication for these northern people with the outside world, something they have not at present. The representation being made to the department by the Federal member an appropriation of \$8,000 was put through Parliament for the building of the line. The government is ready to act at once on the building of the line. The office to be established on the line will be set just as soon as possible.

Great Interest Being Taken in Eclipse

English Railways Will Run Special Trains to Vantage Points

London.—The eclipse of the sun which will be observed by a portion of England, June 15, is arousing such interest that railway and motor bus companies are preparing to carry thousands of excursionists to the favored belt across England where the view will be best. More than 100 special trains and hundreds of motor vehicles will carry their passengers to the largest open air party ever known in England. Most of the participants expect to arrive at vantage points around midnight.

WILL OBSERVE LUNAR ECLIPSE IN FAR NORTH

New York, N.Y.—The outposts of civilization in the Canadian Arctic wilderness have been asked by radio to aid the Harvard University Observatory in observing on June 15 the first lunar eclipse since 1892. Observers in the northern country in the region of Chesterfield Inlet, Bear Lake, Rampart House and Good Hope had a message of instruction broadcast to them recently.

Directions for the observation of this rare lunar phenomenon, addressed to members of the Royal Canadian Mounted Police, representatives of the Hudson's Bay Company and Revillon Freres Trading Company, and the Oblate missionary fathers among the Eskimos, was broadcast in part as follows:

"A total eclipse of the moon will occur on June 15, 1927, the center of the eclipse being at 224 a.m. Eastern Standard Time. The sun and moon will both be nearly on the horizon on the day and hour mentioned, at the points to which this message is addressed."

"It is of great scientific interest to know as exactly as possible what the weather conditions are at that particular time at points near this line. Baker Lake is the most important point of all and the astronomers would appreciate any special efforts to procure observations there."

According to Dr. Willard J. Fisher, of Harvard, it should be possible this year to determine the density of the earth's shadow very near to the edge of the earth.

ACTIVITIES OF SOVIET AGENTS COME TO LIGHT

London.—It was stated in official circles that the names of hundreds of persons in Great Britain, including a number of members of Parliament, as well as persons more or less known in North America and other parts of the world, in addition to those published in the white paper, have come to the hands of the Government during its investigation of alleged Soviet activities.

So far as is known, the names of the members of the Parliament will not be made public, as it is understood the Government has no intention of taking what cabinet members consider advantage of their special information to further their case against the Russians.

In parliamentary lobby circles, however, it is thought likely the names may be made known to the leaders, which fact may have more or less bearing on the situation generally be used as a check upon certain sections inclined to oppose the Government's moves and decisions.

A movement spokesman attributed several Australian shipping strikes in the last two years solely to Soviet agents, who, he said, went to that country to spread propaganda, stir up trouble and further Moscow's aims.

The British Government made good its promise to publish some of the 16 documents alleged to have been uncovered in the recent sensational raid on Soviet House, in London, headquarters of the Soviet trade delegation, and Arcos, Limited, the Russian commercial organization.

It issued a white paper containing the documents to illustrate, as the paper said, "the hostile activities of the Soviet Government and the international organization against Great Britain."

The most interesting part of the contents from an internationalist point of view is a list of addresses allegedly found in the possession of Anton Miller, a Soviet cipher clerk, who Premier Baldwin told the House of Commons in his Tuesday's speech, was found hurriedly burning the papers in his office when the raiders appeared.

Want Canada to Attend Air Meeting

Invitation to Attend Inter-American Convention Is Suggested

Washington.—Canada will be invited to join other countries on the American continent in an inter-American flying convention, if the recommendation of Argentina carries the Pan-American congress this year. At the commercial conference of members of the Pan-American union, just concluded here, the Argentine delegate, Felipe Esplá, recommended that the governing body of the union study ways and means of bringing Canada into the flying convention which all republics on this continent have in mind. Mr. Esplá's suggestion was placed in the record and will be considered by the governing body of the Union before the flying convention is concluded.

Ferguson Willing to Co-Operate

Toronto.—Premier Ferguson states that he would co-operate with the Alberta Trade Commission in the proposal left before the Ontario Government by a delegation from Alberta that a national committee be organized to promote inter-provincial trade, with special emphasis on the use of Alberta coal in the Eastern provinces.

Check Fever Epidemic

Montreal.—Preventive measures taken by provincial and municipal officials to check the spread of the present typhoid epidemic are working successfully, health authorities claim. It was predicted that within one month the epidemic would be stamped out.

Arms Parley in June

Washington.—The three-power naval limitations conference called by President Coolidge will convene in Geneva on the afternoon of June 20. Secretary of State Kellogg informed the British and Japanese ambassadors after informal conversations had shown the date acceptable to all.

Radio Typewriter

Rome.—A typewriter capable of receiving radio-phonograph communications at great distances is to be tested between Rome and New York shortly. The machine transmits automatically, typing on ordinary paper, guided by radio waves.

THE COLEMAN JOURNAL

2ND AVE., R., COLEMAN, ALBERTA. - R. F. GARR, Editor and Publisher
An independent paper published every Thursday. Subscription rates: \$2.00 per annum in advance; to U. S. and Great Britain \$2.50.

Legal, government and municipal advertising, 15c a line for first insertion and 10c a line for subsequent insertion.
Transient advertisements to be paid for when ordered.
Display advertising rates on application at the office.

THURSDAY, JUNE 2, 1927

SALES TAX REGULATIONS.

Owing to amendments which have been made to the sales tax regulations in the last month, The Coleman Journal will be compelled to add to all invoices for printing supplied in the month of May a tax of four per cent., which has to be paid over to the government. There has been a good deal of uncertainty in regard to the application of this tax to printers in the past, and hitherto there has been an exemption of those establishments doing less than \$10,000 worth of printing per year. This exemption has now been cut to \$3,000 per year, which means the tax will include all but the very small printing establishments.

The collection of this tax by the printer from the customer does not really mean the imposition of a new tax, but is simply a change in the method of collection by the government. Hitherto the printers have been paying the sales tax on their purchases from the wholesalers, by whom it was paid over to the government. Now it is left to the printer to collect the sales tax and hand it over.

The collection of the sales tax applies to printing only, and not to advertising in a newspaper.

HOW'S BUSINESS?

This is a question on everybody's lips these days. How's business? For the grogger it is fine. For the disciples of Old Man Gloom, it is slow. Nationally advertised products are making sales for the merchant who gives these goods the display on his shelves and counters, and follows it up with newspaper advertising. Unknown brands are holding down shelf space, waiting for that trade killing slogan "Just as good" to send them into the reluctant buyers' hands. Why not minimize sales resistance by concentrating on selling products that the housewife is familiar with?

BETTER NOT SAY IT.

Bad news travels faster than good news. There is an old saying "No news is good news." Let a man be converted at a church service and there is not much of a stir, but let a resident be convicted of crime and the news leaps by word of mouth, from one end of the community to the other.

That is why we have refrained from publishing court news. There is little of uplift in a court. Most of the events reviewed there are of a sordid nature, and the recounting of them serves only to whet the appetites of those who like that sort of thing. "Better not say it" has been our motto, although a number of our subscribers have taken us to task for it. They have argued and perhaps rightly so, that such doings as the court reviews should be "advertised," and the participants made public examples of, by letting every one know who these "boot-leggers" and other law-breakers are. But people know them all right—know them too well. Given a little rope, and the bootlegger "hangs" himself. The law-breaker is his own worst enemy, and finally comes to the end of his rope. People are long suffering, they put up with him for a long time; he gets more daring and disrespectful for the law and law-enforcement, until finally even his own accomplices and defenders turn against him and he is left to "kick against the pricks." No, it needs no publicity

to bring him and his kind to justice—and in the meantime it is better for all that he occupies so little of the attention of the public eye.

Wit and Wisdom

When road hog meets road hog the garage man smiles.

"Wider Roads Needed"—Headline. So they can get a better aim at the pedestrians?

The cost of election has risen to such a figure that it is hardly appropriate to speak of an office as a "gift" of the people.

Professor—A geologist thinks nothing of a thousand years.

Student—What! I lent one twenty-dollars yesterday!

A candidate is a person whom, after you have voted for, you wish you had voted for somebody else.

A bathroom is a place that somebody else is in.

American family life; Sleep, scatter, eat, scatter.

All wealth comes out of the ground, but only after long and hard digging.

Automobiles, fur coats and silk stockings—and yet we have many people who complain of an income tax.

A Few Chestnuts

"You say the prisoner had been drinking," said his worship to the policeman who was giving evidence. "Drinking what?" "Whiskey, I think," replied the constable. "You think," stormed his worship. "Don't you know the smell of whiskey? Aren't you a judge?" Came back the reply. "No; I'm only a policeman."

These Modern Twists
Police Chief: "What! You mean to say this fellow choked a woman to death in a cabaret in front of two hundred people, and nobody interfered?"
Cop: "Yes, Cap, everybody thought they were dancing."

"Brethren, we must do something to remedy de Status Quo," said a negro preacher to his congregation.

"Brudder Jones, what am de Status Quo?" asked a member.

"Dat, my brudder," said the preacher, "ain Latin for de mess we're in."

FRENCH PROPOSAL REJECTED
Louis Louchere, one of the French delegates at the International Economic Conference at Geneva, outlined a colonial scheme to the Conference to form a world-wide combine of all industries, to be operated by an international organization at Geneva, but it was rejected.

Pontiac Passes The One Hundred Thousand Mark

A new mark for the automotive industry to shoot at was set when the 100,000th Pontiac Six rolled off the assembly line less than fifteen months from the time car No. 1 was built in January, 1926. Pontiac factories at Oshawa, Ont., and Pontiac, Mich., are working at high speed, and it is expected that the current month will see this unique record followed by the greatest production of any month in Pontiac's history.

"Completion of the hundred-thousandth Pontiac Six was hastened by the heavy influx of orders for Spring delivery," said George E. Ansley, general sales manager of the Pontiac division, General Motors Product of Canada, in referring to the event. "There is a close relation between the recent announcement of the new and finer Pontiac Six at new low prices and the volume of Pontiacs built during the car's very brief history."

The Pontiac Six met with an instantaneous acceptance by the public, which had long been waiting for a quality six cylinder car at such prices. The unprecedented demand for the new car necessitated immediate and expensive expansion of Pontiac manufacturing facilities, and these in turn are enabling the manufacturer to divert the savings of volume back to the public in the form of numerous refinements and the recent substantial reduction in price."

To The Rocky Mountains

(F. N. MacGregor, in the Bassano Mail)

Unto the hills which God hath made majestic,
We lift our eyes to beauty and to strength;
Towering above in all their rugged grandeur,
Seeming to say, "I know He gives me strength."

From the low foothills to the highest hilltop,
God hath revealed to us the artist's brush.
In blues, green and gold, and purple,
And in the twilight blends of Nature's hues.

Methinks 'tis then their beauty is majestic,
And in the meadows dotted o'er with green,
Gliss by the river murmuring low and lovely,

Thus do I gaze upon a Rocky Mountain scene.

Time cannot harm you, nor can it mar your beauty;
God hath so willed it to the end of time;
And generations all shall look in wonder,
And, looking, feel the touch of his line.

Here and There

When the internal trouble which has been devastating China for the last two years subsides, a tremendous market will open up for Canadian wheat in that country, according to J. E. Scott, representing a large British firm at Hong Kong, on his way back to London to report.

Bounties paid for bob-cats in New Brunswick, by the Department of Lands and Mines, have so far exceeded the figures for the corresponding period of last year, according to L. A. Gagnon, chief game warden, who states that wild cats are being killed in greater numbers each year.

Ontario buyers of milk cows have about completed the purchase of five carloads of Guernsey cows from Colchester, Cumberland and Picton counties. The buyers are Anderson Brothers and Messrs. Graham and Calder from the Hamilton districts.

MISS HORTENSE CARTIER
The only surviving daughter of Sir George Edmund Cartier, who has accepted the invitation to come to Canada this year for the celebration of the Diamond Jubilee of Confederation.

The first auction sale of horses that has taken place in Montreal for some years was opened at the East End Stock Markets, March 28. Stabling was put at 300 horses and it was stated that approximately 200 horses were sold. The demand was mostly for heavy draught horses, Percherons, Clydesdales and the like, for carriers and for lumbering purposes, coming chiefly from Alberta and Saskatchewan, and some from the middle west.

Consequent upon an agreement reached at a general conference of Canadian and United States Telegraph companies the Canadian Pacific Telegraphs have announced that code words will be accepted at all their offices in future for day and night letters. This departure will affect both Canadian and international business, the companies concerned being the Postal-Telegraph Company, the Canadian Pacific Telegraphs, the Canadian National Telegraphs and the Western Union Telegraph Company.

The development of a new industry from the propagation of muskrats, in land and water areas, leased from the Province of Alberta through agreement with the Dominion Government, was indicated by Hon. George Hoadley, Minister of Agriculture, in committee discussion in the Alberta Legislature. The amendment would give the Government power to regulate and license fur and game farms, and to lease the Dominion water and land areas for the propagation of such animals.

A keen competitor to Betsy Wiley, the Nova Scotia world's champion milk and butter producer, has been discovered at Fox River, Cumberland County. Mr. Henry S. Kear of this place, claims that he owns the champion butter producing cow in her class. This cow is a grade Ayrshire and Durham cow, which has just recently freshened. In one week she produced 392 lbs. of milk, which churned 20 1/4 lbs. of butter, after deducting approximately 12 quarts of milk and 1 1/2 quarts of cream for home consumption. This record is creating keen interest.

Following upon his recent announcement to the effect that a Toronto firm of architects would be employed in connection with the erection of the new Canadian Pacific Hotel in that city, E. W. Beatty, Chairman and President of the Canadian Pacific Railway, recently stated that Messrs. Spratt and Ralph had been appointed associates with the firm of Ross and Macdonald, of Montreal, to handle this work. Messrs. Ross and Macdonald have been employed in Canadian Pacific work for some time, the latest of their buildings being the company's new hotel at Regina. It is desired that the new hotel shall be thoroughly representative of the city in which it stands and the appointment of a firm of Toronto architects is made to further this purpose.

The exterior of the Miners' hospital is receiving a coat of stucco.

CHAPTER XXXVI—Continued.

The man to whom Graydon talked went over to the table where Eggleston sat, his head set well down on his shoulders. Other men stood at the table, too, important men, they seemed of the importance that marked by large achievements. Among them was a noted sculptor. And an artist, and two or three famous architects.

On the massive table, between them and the banker, and where John's blueprint once had been spread, lay a gleaming white model stood, the miniature of an imposing structure of great halls and marble columns reaching upward to a cold glare above the dome a figure peaked, a slender figure that seemed to inspire some ineffable joyousness. The sculptor, one whose name he did not know, his fingers lightly over the delicate form designed later, to be translated into marble. This part of the model was his handiwork. He was proud of its perfection with the monumental structure it was to embellish.

Eggleston, who had watched quietly, observed. "That was her idea. She explained to me across this table when she brought me the drawing. She was pleading had been bothering her about life in them, instead of death." The banker chuckled, and the sternness in his eyes softened. "She said she had most kind of memorial always made for me because they reminded her of so many people who weren't dead that ought to be."

"Person, chief of the firm which had sponsored John, broke in. "So it was she, after all, who convinced the soldier as always stirred to valor by the kiss of a girl—or of a woman who is still a girl to him? You compelled me to get the explanation across my desk to young Wilmore as if it were my own? I fought against it, for a time, but the grandeur of it came to him suddenly. Shall we tell him—today?"

"No," Eggleston replied. "It will be sufficient for him to learn, from us, that the money with which he has worked this model out, the funds that promoted his idealistic plan and translated his blueprints into this step toward reality, came from her—that this was how she used the money I gave her but

which remained so much a mystery to her.

After a brief pause the banker said, dryly.

"Whatever else there is for him to know I imagine she'll tell him. If she wants to."

Brandon, who was talking with Graydon, turned to meet Eggleston's eyes fixed on him with a quick expression in them. Brandon nodded.

"Yes," he observed, "she'll have many things to say to him, I fancy. For his sake, I hope she doesn't say them with a champagne bottle."

The ancient butler, whose years had done with those of his master, entered noiselessly and went up to the table.

"The young lady has arrived, sir," he announced.

"It will be quite all right, won't it," she asked brightly, "if I ask you to share me, with him?"

There was instant stillness. All in the room looked implacably at the banker, who made a sign to Graydon. The butler went out. A moment later, Joanna, suddenly startled by the faces turned toward her, was framed in the doorway. Graydon went up to her and took her hand, gently, and led her into the room. He announced to the company, simply:

"This is Joanna."

One by one the important-looking men pressed upon her. Bowed, he bowed, fighting for some inkling of understanding, she heard the murmur of words—words, words! Each man took her hand and pressed it. And she had come here, she had come here, they spoke earnest compliments; they uttered soulless things she couldn't fathom. And as each one bowed and left her he passed out of the room until, at last, there was only Graydon, Brandon and Eggleston.

At Brandon's lips she saw the old smile, the old smile, but different. And she saw the same lights in Eggleston's eyes she used to detect in them when they sat across the table together.

"Please," she pleaded, "What does it all mean?"

Brandon faced her. "It means," he said, "that things are going to be straightened out. For as long as it means is that you are to know that both of us and I were playing a game—and that, because you won, that night on La Turbie when I had the bandits turn you back into the club house, nobody is happier than I."

He left the room then, with Graydon, and Joanna faced her bankers alone. Eggleston rose and walked around the table to where she stood, still gripped in the spell of her bewilderment.

He led her to the fireplace and, taking her by the shoulders, turned her around so that she faced him. Above her the canvas image of the girl in the gold frame looked down. The banker went back to his chair at the table. For a long time neither

spoke. Joanna stood almost motionless, her face deathly white. Eggleston gazed at her and the saw that his eyes wandered from her face to the painting over her head, and then back again. At last, he said:

"Your money, my dear, was from me. It was I who was your mysterious benefactor, and it was I who determined that there should be no conditions attached to your gift. I wanted to know how you—a girl of today—would use what you would turn, if left to your own resources."

"It was because of a silly old man's romance—a romance of young days when, people have said, young girls were different. The one in the painting above you was she to whom I made my promise that I would make her happy and rich. She did live—even to marry me. So I've lived here. The fortune came, but all that I've had of her is the memory in him painting there."

"I've a lot of money, my dear; so have all my relatives. I've had the wish, in late years, to leave a great deal of it to someone who can carry on, when I'm gone, for the gift up there who has carried on with me. But I've never had confidence in any of you—any of your young people of these days. I admit I couldn't understand you. Your friend, and my friend, Graydon, told me I was a fool. He claimed to know me all—because he knew so many of you, in the store. He told me of you, of a Miss Twenty-seven, who, he said, needed him, he was painting over my fireplace. Well—that's about all. We decided to try you out—and we have. I thought it would cost me a million dollars. Instead, I have profited. It has all come to you. If you will have it that way—I know, now, that you can carry on for her."

There was much more that Eggleston said, much that he said with his lips. Shadings and laughter and much of wonder moved in changing procession across the deep brown eyes of the girl who crumpled at his feet. But the silence he said, the useless foolish things that people say when they have much to tell each other of themselves alone. When they spoke of anything else it was of the model on the table, and of how the money had been used, and of Joanna's request to make fulfillment of the promise of it.

Of Brandon, and Yvonne. "In a way of his own planning he had tested you, and it was with no encouragement," the banker said. "He, like me, was skeptical. He proposed to know you girls of today. He admits he didn't know you at all. I kept from him the secret of your use of your money. I allowed him to test you to the end."

"That was why, then," Joanna observed, "he threw me into the company of—you? I've known there was a reason. I've found over it. I think the knowledge I've always realized she was leading me up to things, showing them to me, and then saying me from them."

He nodded gravely. "Yes," he said. "I have the impression that one may be profoundly mistaken about many of the world's Yvonne Counts."

Into the silence of the library the old butler entered.

"Mr. Wilmore has come, sir."

Joanna, with a sudden catch in her breath, rose. For a moment she looked up into the face of the girl in the painting—the girl of yesterday.

"If you would wait," she said quietly, her face pale again. "I'd like to see him in here—alone."

At the door Eggleston felt her hand on his arm. He saw that the color had come back into her face and that she was smiling up to him. "It will be quite all right, won't it," she asked brightly, "if I ask you to share me, with him?"

... ..

It was that Joanna, Joanna of the deep brown eyes and the shimmering gold gown, hair of the skirts too short and the lips too red and the tongue too pert. She is the girl next door, or, at the farthest, just across the street. Nothing more, and no less, than the Modern American girl.

THE END

Scream is a weapon that should be drawn only in self-defense.

Honoring the Spirit of the Pioneers

Spirit of Romance and Adventure Should Always Remain

One portion of Lord Willington's speech in reply to the civic address of welcome that met with a warm response in Calgary, was his reference to the pioneers.

"You speak of this city," he said "as having been in the past, one of the frontiers of romance and adventure, and you say that it has happily never lost its distinctive features. That it never will, for however conditions may change, it is always well that the romance and adventure of the past should remain with you, and that you should always keep alive the spirit of the pioneers who laid the foundations of your great and increasing development."

Calgary appreciates the sentiments uttered by His Excellency. Happily, too, has the spirit of the pioneers of Alberta with us. This city does not neglect them. It holds them in respect and affection. They still play their important part in all activities that may contribute to the furthering of the welfare of the city. Indeed, they look upon the city—as they have the right to—as their child, and their fostering care and interest still surround them.

They have witnessed its growth from birth and through all the anxieties and setbacks of youth to its present maturity and assured position. They can take a special pride in the city that they founded. But the younger citizens put more actively carrying the burden are not disposed to dispense with their advice and co-operation. The Herald knows of no city in Canada where youth are so more unitedly and more enthusiastically work together for their home city, the latter for the city which they help to create, the one for the other.

They have through all the anxieties and setbacks of youth to its present maturity and assured position. They can take a special pride in the city that they founded. But the younger citizens put more actively carrying the burden are not disposed to dispense with their advice and co-operation. The Herald knows of no city in Canada where youth are so more unitedly and more enthusiastically work together for their home city, the latter for the city which they help to create, the one for the other.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. These not so it would not be known of no city in Canada where youth are so more unitedly and more enthusiastically work together for their home city, the latter for the city which they help to create, the one for the other.

Continues to Hold Record

Men on B.C. University Farm Pays Well For Her Keep

That eminent representative of the White Leghorn family, popularly known as "Maizie," but officially designated as "Hiv 6," on the roster of the University of British Columbia Farm, continues to merit and receive the approbation of the public. She is the gifted producer of 351 eggs in 365 days, a world record, and the output of her genius sold so far has brought to the farm \$1,625, while recreational totalling \$1,275 are on the books.

Maizie presides over the world record pen, having for her associates four other hens, each of which has conferred on civilization at least 299 eggs in a year. The eggs with which they reward their protectors fetch from \$5 to \$10 each, and descendants of the occupants of the pen are domiciled in all parts of the Dominion and the United States, engaged in the upbuilding of the poultry industry.

Suburban chicken raisers should give their attention to Maizie and her colleagues. A few performances of her capacity would soon lift the second mortgage, and she costs no more to feed than the voracious loafer in the poultry yard.

BABY'S OWN TABLETS

HELP A PRIZE WINNER

Baby's Own Tablets are without an equal for little ones. From the newborn babe to the growing child they are an absolute safeguard to health. One mother has used them she will use nothing else. Thousands of mothers always keep them on hand. Among the mothers who state that Baby's Own Tablets are the best medicine for little ones that they know of is Mrs. Russell Hill, of Norwood. Her experience with the Tablets should be of great benefit to any mother who has not already given them a trial. Mrs. Hill says: "I have five fine healthy children, and from the youngest to the oldest they get no other medicine than Baby's Own Tablets. When our baby girl was eleven months old she won second prize at the Norwood Fair, and when she was a year older she won first prize in competition with twenty-eight other babies. It was the Tablets that gave her the health and robustness to carry off these prizes. I always delight in telling other mothers what the Tablets have done for my children."

They have witnessed its growth from birth and through all the anxieties and setbacks of youth to its present maturity and assured position. They can take a special pride in the city that they founded. But the younger citizens put more actively carrying the burden are not disposed to dispense with their advice and co-operation. The Herald knows of no city in Canada where youth are so more unitedly and more enthusiastically work together for their home city, the latter for the city which they help to create, the one for the other.

Towns and villages along the main highways throughout Alberta will have an opportunity to put those portions of the roads within their bounds in good traffic condition if they will undertake to pay half the cost. The provincial government has decided on a fifty-fifty proposition that contemplates connecting up all the now uncompleted gaps in the main highway system lying inside urban limits.

Here and There

It is estimated that 23,500,000 acres will be sown to crops this year in the West, an increase of 2,600,000 acres over 1928.

Canadians hold the record for eating eggs. The average Canadian last year consumed 337--a record according to Dr. J. H. Girdale, Deputy Minister of Agriculture.

Tobacco-growing is flourishing in Western Ontario, and this year the acreage will likely run to 45,000 or double that devoted to the production of this plant in 1928. The crop last year was valued at \$6,000,000.

One of the most powerful radio stations in Canada will be erected at Red Deer, Alberta, in the near future. Stations will be operated in Calgary and Edmonton by remote control to the main station.

New Zealand will be officially represented at the World's Poultry Congress at Ottawa, July 27 to August 4. R. W. Hawke, one of the Island Dominion's best known poultry breeders, will represent that country.

Besides the game fish hatchery which will be established by the Dominion Government in the Waterton Lakes district in Southern Alberta, a commercial fish hatchery will be established in the north. The latter will also handle certain species of game fish suitable to lake waters.

The Canadian Pacific steamship passenger traffic through the port of Saint John during the winter season of 1928-7 was over 40 per cent. greater than that of the previous season, and it is expected that the summer traffic through the St. Lawrence port will show a still greater increase.

The last addition to the chain of Canadian Pacific hotels is the "Hotel Saskatchewan," located at Regina, opening on May 24. It is one of the finest of the chain of the character in keeping with the importance of the capital city of the Province which furnishes 50 per cent. of the Dominion's wheat output. The hotel is 12 stories, containing 218 bedrooms with bath, and many beautiful public rooms and administrative offices.

The Canadian Pacific Railway Company reports from Winnipeg the marketing of grain at the present rate of 180,000 bushels daily, as compared with 123,376 for the corresponding season of last year. Manitoba's 180,000 compares with Saskatchewan's 633,000 and Alberta's 868,827. Loadings are also above last year's record with 220 cars daily.

The greater portion of the bells forming the carillon to be installed in the Victory Tower, at Ottawa, were shipped from England on May 7 by the Canadian Pacific steamship "Balfour." The carillon, consisting of 53 bells, is regarded as the finest in the world, and have been cast at the famous bell foundry at Croydon. The bells are a portion of a national memorial to thousands of Canadians who laid down their lives in the Great War.

The Province of New Brunswick is rising in importance as a farming province. The report on the fur farms of Canada just issued by the Dominion Bureau of Statistics shows New Brunswick at the head of all the provinces in the matter of the yearly gain in the number of fur farms. These increased by exactly 100 in the year ending March, 1928, nearly doubling the number of the year before and standing in the later year at 204. Prince Edward Island still leads the Dominion in the number of fur farms, having 570 out of a Dominion total of 2,383, the latter figure comparing with 2,130 the year before. The provinces rank as follows: Prince Edward Island, 570; Ontario 485; Quebec 451; New Brunswick, 204; Nova Scotia, 192; Alberta and British Columbia, each 120; Manitoba, 53; Saskatchewan, 42, and the Yukon Territories, 20.

Local and General Briefs.

Michel and Coleman baseball teams are scheduled to play a game on the local diamond Wednesday evening, June 8th. Come out and see the first game of the season and boost for the boys.

Mr. Stewart Milley is driving a new Ford Sedan which he recently purchased from the Coleman Garage Limited.

Mr. James Fairhurst, 6th street, is on the sick list this week, and Mr. Ashbridge, of the International Coal Company's office staff, is reading the electric light meters this month end.

Mrs. Sidney Short and daughter, are visitors in Lethbridge this week.

Mrs. Wm. Fraser, who has been visiting relatives and friends in Nova Scotia during the past year, is expected to arrive home shortly.

Mr. Jack Graham, of the Edmonton postal staff, arrived in Coleman on Wednesday morning, and will spend a week visiting his parents, Mr. and Mrs. F. G. Graham.

Mr. Geo. Fisher, of Natal, purchased a McLaughlin-Buick Special Sedan from the Coleman Garage Limited, last week.

Page, Coleman's representative on The Pass football team which played a Lethbridge and district team in Lethbridge last Saturday, scored one of the two goals secured by the visitors. The Pass team won the game 2-0.

"Thoughts of God!" will be the morning subject at the United Church at the anniversary services on Sunday. In the evening Mr. Best will speak on "A Brother and a Star." There will be extra music during the day. "How to be Happy Though Married" is the title of a popular lecture which Mr. Best is giving on Monday evening following the annual dinner. A cordial and general invitation is extended to the public.

Never be polite or courteous to a commercial traveller. He is used to being shouted at or ignored. Decent human treatment might upset him--he is not used to it. Some travellers have weak hearts, and could not stand the shock, and to be summoned as witness on a corner's inquest is always an unpleasant experience.

Richard Washburn Child says people talk too much. Constant talking, he says is a great physical strain, and saps the energy of the body. Perhaps that is why they call women the "weaker sex."

A Toronto judge has decided that tennis may be played on Sundays in that city. A game where there is so much "love" should be quite a proper game for Sunday.

Some one has said that the idea of charity with some people is to donate reading matter to the home of the blind, phonograph records to deaf old ladies, and deep sympathy to starving Armenians.

A total of 323 companies were incorporated or registered in Alberta during 1926 with a total capitalization of \$44,710,000.

Every motorist in British Columbia may in future at the discretion of the police be stopped and compelled to have his car undergo a test for brakes and lights, according to changes in the Motor Vehicle Act announced by Attorney-General Manson. The police are given authority to take the cars to police headquarters for the tests. The use of spotlights on the front axle is authorized.

"One advantage of checkers," says a local enthusiast, "is that a wet day doesn't knock you out of playing."

Not Much Difference

"I wonder," said Mrs. Jinks to Mr. Jinks, "why we say 'good evening' when a visitor calls and 'good night' when he leaves?"

"Force of habit, I presume," said Mr. Jinks. "Evening and night are synonymous terms."

"Well," continued Mrs. Jinks, "they may be synonymous, but I guess you'd rather have the society column report that I appeared in a tasteful evening gown instead of saying that I was clad in a tasteful nightgown."

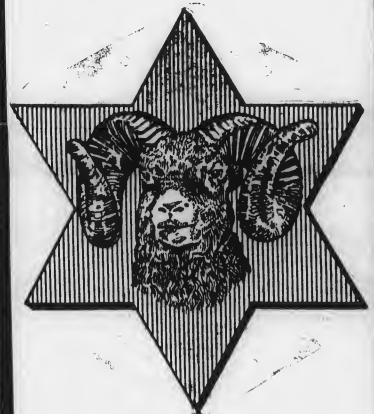

The world may owe you a living, but you'll have to collect it yourself.

LONDON, June 1.—The Conservatives lost a seat in the house of commons today at Bosworth by-election caused by the resignation of Captain Robert Gee. A Liberal captured the seat when Sir Wm. Edges polled 11,981 votes; J. Minto, Labor, 11,710; and Brig.-General E. L. Spears, Conservative, 7,685.

Said the Shoe to the Skirt

Time was when you was close to me. You'd sometimes stroke my face; But lowly though I still must be; You're in a higher place. But, oh, remember, as you away Above me, blithe and pert, You made me what I am today! The Shoe said to the Skirt.
